## The 11th International Research Seminar on Supply Chain Risk Management

The University of North Texas at Denton hosted the 11th Annual Meeting of the International Supply Chain Risk Management (ISCRiM) network. The meeting was attended by seven scholars from Italy, Finland, Portugal, and the US. Several logistics faculty members from UNT also joined in for a variety of sessions.

The meeting started with introductions of participants and welcome messages facilitated by Ila Manuj. Dean Finley Graves welcomed the participants and apprised the participants of the latest developments with the College of Business (CoB) at UNT. Chairperson of the Department of Marketing and Logistics, Dr. Jeffrey Sager, expressed his delight at hosting an esteemed group of researchers. Dr. Terry Pohlen, Director of the Center for Logistics Education and Research (CLER) also addressed the group and mentioned that hosting the ISCRiM meeting is a privilege and ties very well with the research goals of the University, the College, and the Department.

A variety of topics were covered. There were energetic and friendly discussions among the participants for every session. The list of topics and presenters are as follows:

- Managing Price Volatility: A Supply Management Perspective (George Zsidisin)
- The Development of a Time-series Experimental Design (John Macdonald)
- Drivers of purchasing risk management (Jukka Hallikas)
- Supply Chain Risk Assessment: Comparing Theory and Practice (Barbara Gaudenzi and Ila Manuj)
- Supply Chain Risk Assessment – A Holistic Approach (João Dias da Silva)
- The Role of Demand Management and Supply Chain Risk in Organizational Effectiveness (Pam Donovan and Ila Manuj)
- The meeting included an update by George Zsidisin on the new book by the members of the ISCRiM network titled “Handbook for Supply Chain Management: Cases, Effective Practices and Emerging Trends.” The book is edited George Zsidisin and Omera Khan.
- The closing session was devoted to brainstorming about the role of the ISCRiM network and identifying interesting areas for future research.

## The third new joint ISCRiM book with contributions from a number of members

### **Emerging Themes in Supply Chain Risk Management**

#### **A Collection of Case Studies and Practices.**

Editors: Khan, O.; Zsidisin, G. (2011)

J. Ross Publishing Inc., Fort Lauderdale, USA.

This title offers comprehensive coverage of current and supply chain disruptions and risks. Failure to manage supply chain risk effectively can have a significant negative impact on an organization. "The Handbook of Supply Chain Risk Management" brings together more than 30 international authors to provide a set of best practices, processes, tools and techniques, supported by cases and illustrative examples, that can be adopted to proactively evaluate, manage, or mitigate risk in their supply chains and to improve overall business performance.

### **Managing Commodity Price Risk**

#### **A Supply Chain Perspective**

Authors: Hartley, Janet L. and Zsidisin, G. (2011)

Business Expert Press, USA.

Every business is exposed to financial risk stemming from commodity price volatility. Risk exposure may be direct from the prices paid for raw materials needed for operations or indirect from higher energy and transportation costs. The purpose of this book is to provide an approach that organizations can implement to manage commodity price volatility and reduce their exposure to financial risk. This topic is important for current and future supply chain professionals due to the significant direct financial effects that price volatility has on profitability, organizational cash flow, the ability to competitively price products, new product design, buyer-supplier relationships, and effective negotiating. The book is oriented toward supply chain professionals and executive education courses. <http://www.businessexpertpress.com/books/managing-commodity-price-risk-supply-chain-perspective>
